

1. Clone  
git clone https://github.com/docker/getting-started.git
2. run  
docker run -d -p 80:80 docker/getting-started
3. Go to downloaded directory  
cd getting-started
4. Use the docker-compose.yml file  
Docker compose up
5. Change directory to getting-started\app  
cd getting-started\app
6. Create and fill dockerfile  
type nul > Dockerfile
7. Build container image  
docker build -t getting-started .
8. Start an app container  
docker run -dp 3000:3000 getting-started
9. Update source code `src/static/js/app.js` (line 56)  
<p className="text-center">You have no todo items yet! Add one above!</p>
10. Update version of the image  
docker build -t getting-started .
11. Start a new container using the updated code  
docker run -dp 3000:3000 getting-started
12. Remove the old container. Get the ID  
docker ps
13. Stop the container with found ID  
Docker stop 15eec5b48d8c
14. Remove the container  
docker rm 15eec5b48d8c
15. Start the updated app container  
docker run -dp 3000:3000 getting-started
